

Hoeppl - Salmhofer Residence and Offices, Graz, Austria
Project scope: schematics, design development, supervision
Completed: 1995
Client: DI Wolfgang Hoeppl, Mrs. Angela Salmhofer
Size: 6,000 sq. ft.
Budget: \$ 900,000

The up-slope property is located on a west-facing slope of the "Ruckerlberg" in one of the most beautiful central areas of the city. The family's wishes included an office for Mr. Hoeppl's surveying business as well as a residence. The building is designed into the slope of the hill in order that the lowest portion, the offices are facing the street while providing a generous terrace for the residence above. This arrangement provides generous private yard space to east and west of the residence and offers exposure and separate access to the offices. All bedrooms are located at the terrace level and each of them provides separate access to the outdoors.
